

COLOR WHEEL

THE PRIMARY COLORS ARE- RED, BLUE AND YELLOW

WE ARE USING TWO DIFFERENT PRIMARY COLORS THAT EACH LEAN TOWARDS THEIR SECONDARY COLORS, (OR A WARM AND COOL VERSION OF EACH PRIMARY COLOR)

THE SECONDARY COLORS, ORANGE, GREEN AND VIOLET, ARE FORMED WHEN THE PRIMARY COLORS ARE MIXED TOGETHER.

- TO MAKE CLEAR, BRIGHT SECONDARY COLORS, MIX THE PRIMARIES WITH THE SAME BIAS TOGETHER, IN THE DIRECTION OF THE ARROWS.

TO MAKE MUTED, GRAYED, SECONDARY COLORS, MIX THE PRIMARIES WITH DIFFERENT BIASES - OVERLEAF

ANY COLOR MIXED WITH ITS COMPLEMENT - THAT IS THE COLOR DIRECTLY OPPOSITE ON THE WHEEL - WILL MAKE A NEUTRAL GRAY
